

Legal Intelligence

Product Overview

Legal Intelligence, developed by STELLIGENCE under the STEL.AI brand, is a secure, enterprise-grade AI Software Platform delivered as a Database-as-a-Service (DBaaS). Purpose-built for legal, compliance, and risk functions in regulated industries across Thailand, this platform combines cutting-edge Graph-Based Retrieval-Augmented Generation (GraphRAG) and Semantic Legal Search. It delivers structured, verifiable, and traceable legal intelligence tailored to Thailand's evolving legal and regulatory landscape.

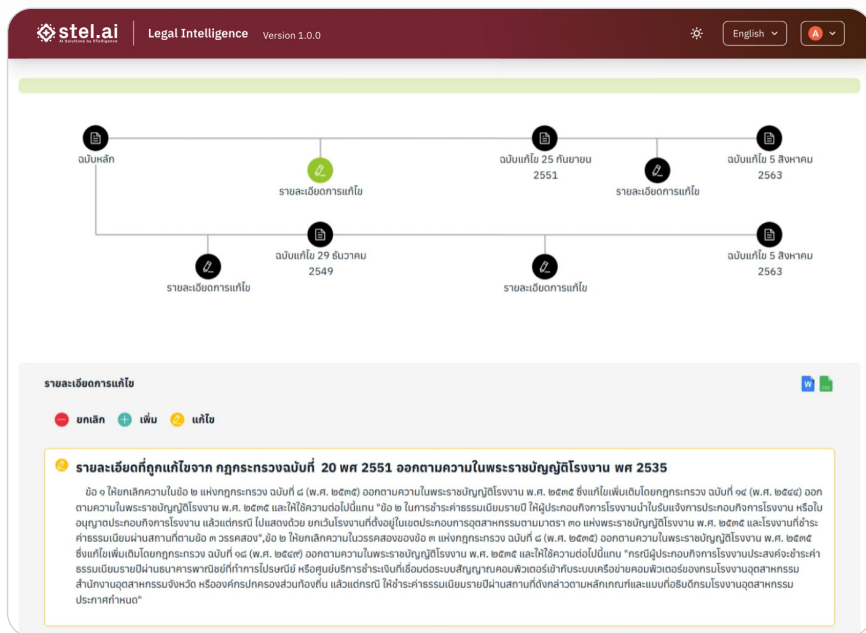

- Conduct rapid and accurate **legal research** across Thai laws, regulations, and Supreme Court rulings.
- Monitor regulatory amendments and **track legal changes over time**.
- Deliver **auditable insights** and legal references that ensure defensible compliance.
- Seamlessly **integrate legal knowledge** into enterprise systems via API.

- Go beyond keywords with intent-aware semantic search trained on Thai legal frameworks.
- Understands statutory relationships, amendments, and precedent interpretation.
- Supports natural language queries to improve speed and usability for legal teams.

- Ensures AI-generated outputs are fact-based and legally verifiable.
- Structured on an ontology curated by Thai legal experts, enabling contextual and jurisdiction-specific reasoning.
- Generates insights linked to authoritative sources, supporting both advisory and compliance functions.

Version Control & Legal Amendment Tracking

- Provides historical versioning of legal provisions, with side-by-side comparison of amendments.
- Classifies changes as repealed, modified, or newly issued, supporting impact assessment.
- Maintains a comprehensive audit trail of legal change history, critical for risk and compliance reviews.

API-Based Enterprise Integration

- Designed for seamless integration with compliance, GRC, and legal workflow systems.
- Delivers structured legal insights directly into enterprise applications.
- Real-time updates from the Royal Gazette of Thailand ensure your teams are never out of date.

Security, Governance, and Regulatory Alignment

- **ISO 27001 Certified Infrastructure** with robust data protection and encryption.
- Fully aligned with Thailand's **Personal Data Protection Act (PDPA)**.
- No user-level access management required—enterprise-level control via API integration.
- Maintains **audit logs** for data access and legal updates, supporting compliance with audit and supervisory expectations.

Deployment Model

- Delivered as a Database-as-a-Service (DBaaS) via secure cloud infrastructure.
- Supports custom API integration with client environments.
- Built for scalability and high availability, ensuring reliable access under enterprise workloads.

Use Cases by Domain

For Legal Advisory Teams

- Respond to legal inquiries with accurate references to Thai laws and judgments.
- Use historical case law and regulatory context to develop sound legal opinions.

For Compliance Departments

- Automate the monitoring of regulatory updates and internal impact tracking.
- Use platform outputs to support compliance risk assessments and internal audit preparation.

For Contract and Policy Management

- Leverage structured legal data to support clause verification, legal drafting, and internal policy alignment.
- Serve as a reference backbone for tools that generate or review contracts in Thai legal context.

Conclusion

STEL.AI Legal Intelligence by **STELLIGENCE** empowers legal, compliance, and risk teams with structured, AI-driven legal research and regulatory intelligence tailored to Thailand's evolving legal landscape. Built on enterprise-grade infrastructure and powered by GraphRAG and Semantic Legal Search, it ensures organizations can act confidently—with traceable insights, seamless integration, and scalable performance. Legal Intelligence is not just a research tool—it's a strategic foundation for defensible compliance, operational efficiency, and future-ready legal knowledge management.
